Get Free The Agility Shift Creating Agile And Effective Leaders Teams And Organizations

What is enterprise agility? Agile organizations can quickly redirect their people and priorities toward value-creating opportunities. A common misconception is that stability and scale must be sacrificed for speed and flexibility. Truly agile organizations combine both: a strong backbone or center provides the stability for developing and scaling dynamic capabilities.

Take a more agile and flexible approach to leadership and adjust required skills and competencies to best support employees and customers from a distance. Retrain leaders and managers to demonstrate how they can adapt their style and continue to bring your values to life and deliver the business strategy.

70% of businesses indicate an ambition to integrate both Business and IT-enabled Agile transformation in the next three years. 81% of organizations have started their agile transformation within the last three years. 45% of businesses indicate that breaking down silos between business and IT is a main driver for their shift towards agility.
